Greetings

I am Mistress Psyche; Headmistress of the London Sissy School

As headmistress of the London Sissy school Iâ??m not a standard school mistress, although I can be by prior request. I love role play..

I can give you teacherly instructions on the humiliating art of sissification and cross dressing and how to become the slut of your dreams but usually the sissy school experience is an improvised experience which involves dressing up in a selection of ever evolving trashy, pink items from my dressing up box and then doing some slutty role play where you are the filthy whore you always wished you were.

My approach to sissification

â?¢ â?¢ â?¢

An article I wrote for Darkside Magazine

Sissification the theo

Domina Psyche looks at sissification and the theories and reasoning behind it...

My name is Mistress Psyche and as my name suggests I like to get into my submissives' heads. I find the psyche-logical aspect of domination most satisfying and it's something central to the curation and creation of my bespoke sissy school sessions

I like to think I have elevated the art of mind fucking or mind pegging to an art form. As the Buddhist saying goes: 'Don't just let anyone waltz through your nice clean mind with their dirty feet' but, dear reader of Darkside Magazine, I don't think anyone here has a nice clean mind, so I'm sure you'll be consensually welcoming me in. With my six-inch black parent stilletos…and cleaning them with your tongue. If that's your thing. If it's not, just use a bit of spit and polish.

Where was I before I went off on a kinky tangent and started sliding the stilleto spike of my thigh-high booties into your cerebral cortex? Ah….I was talking about sissy school and I'm about to get a little serious.

The Theory

I have always been gender non conforming and have played with gender all my life. As a child my favourite toy was Darth Vader, a classic boy's toy.

It has been suggested that my interest in the alpha Sith warmonger was to do with my burgeoning vanilla identity in line with the 'women love a bastard trope'. Vader is the archetypal bad boi in black so maybe I just wanted to change him. And usually I did. Into a selection of Barbie dresses and I can tell you, he looked fabulous.

So there began my interest in sissification. I never had a pin princessy phase myself, the p most little girls have, I found th of being a princess and weari gross. I never liked pink frilly d (on me, anyway) and always those princessy shoes uncom and impractical. They're only looking pretty in. Useless if yo to do anything interesting like slides, or running fast or kickin

As a child I felt quite humiliate any attempt to force me into p clothes and as an adult I get u ocal satisfaction by forcing this onto supplicants at my sissy s

Sissification is grown men full testosterone and intense sexu having a belated princess pha that's how I see it anyway. And just one of the theories that un

sissy school sessions, but if you're thinking to book, don't worry your pretty little head about what that means. I've done all the thinking so you don't have to.

Of course, another aspect of sissification is the humiliation. Sissification differs from drag because drag is empowered. Drag is fierce. The drag queen is empowered. The drag queen showcases the powerful aspect of the feminine. The peacocking, the performance, the funny powerful character names like Avery Goodlay or Frieda Slaves.

The sissy is a very different animal. She is passive and prim. She is the docile, delicate. She is the hopeful slut who needs permission to be used as a f*ckhole and forced to suck alpha cock in a way that will make her pathetic sissy clit swell in it's chastity cage and strain against the pink lace of her pretty pink panties.

I digress. Back to the serious side of sissification. Some feminists take issue with these representations of femininity and their use by men for sexual gratification.

There is some validity in this concern but the rather clichéd notion of femininity portrayed by the sissy of the servile woman who is ultimately just a conduit for male pleasures has plagued women and humanity for centuries, so why not have some fun with it while it's on it's way out.

This sexist clichéd identity has been humiliating women for years. Now it's being used to humiliate men so at least something positive had come from 2,000 years of female repression.

Anyway. Back to the fun stuff. I like to use hypno role play in my sissy school sessions. There is a lot of sissy hypno porn around at the moment and I borrow from that to create hypno sissy role play.

I'm kind of intrigued by which came first. Did the current 'masculinity crisis' cause the increase in sissy porn or did the sissy porn cause the 'masculinity crisis'?

The answer is whoever is shagging the sissy in the arse at the time. The sissy is never allowed to come first, if at all. Anyway, another digression…

Hypno role play has a number of advantages over the standard stuff as you can conjure up all sorts of characters directly out of the submissive's darkest fantasies.

In hypno sissy role play you can be your perfect sissy self. You can have those huge round porn star titties you've always fantasised about. You can have those rock hard nipples that strain against the tight lace of your tarty pink bra.

You can have that perfect little pussy. You can feel it's lips pushed apart as your clitty swells. You can live the excitement of your darkest fantasies safely in a hypno role play conjured up in your mind by a very skilled Mistress.

default watermark

Hypno can also avoid logistical and practical issues involved with forced bi sessions. Why bother to try to organise another human to do anything when you can just conjure one directly from your sub's subconscious. And why stop at one? Just imagine. There are a whole cast of salubrious shady characters that are lurking around the sordid edges of your subconscious. Imagine they step from the shadows one by one to take advantage of you in a way that would fulfil you darkest fantasy. Imagine how depraved they could be when taking advantage of you when their only hard limit is the one set by your mind…

Gender roles are interesting aren't they?

I mean, the way binary gender functions as a codependeny in heteronormative vanilla society. An example of this would be women doing the emotional labour in a relationship so the man can be an emotionless, uncomplaining workhorse and cannonfodder for the military industrial complex. Although this is changing, I think that many men (and women) subconsciously carry this conditioning and are repressed by the burdens and restrictions associated with these roles

The feminist movement has given women an opportunity to voice their discontent with these roles and equally I think the big trend in sissification fetish is part of men beg ning to emancipate themselves from th restrictive roles too.

Just as women wanted the right to wea trousers and go to work, men want the not to. Sissification is the Janus face o female liberation. Women want the righ to be sexually objectified and men wan right to bathe in the gaze of the observ Men want the right to be sexually objec fied. They want the right to self-identify stay-at-home and be the slutty princess their dreams. Good for nothing but suc and taking cock.

At sissy school, Mistress is fully in char and she will mould you into slut you've always wanted to be. Take the weight off your feet and slip them into a pair o princess pink heels and take the weigh your mind. Mistress will take full contro everything and allow you to slip helples away into a state of blissful bimbofication where your only purpose is to be that greedy cum slut you always wanted to We play games at sissy school and of course Mistress always wins, which ha educational purpose of course. To teac you your place in the femocracy. You m have been a beta male but now you ar delta female. A nobody. A mindless slut be moulded and manipulated at Mistre whim.

So. What are you waiting for. Book a session ASAP. Your inner sissy is touch her big full titties in anticipation. Don't disappoint that little sissy guy. Do it tod

Domina Psyche is an experienced pro domme who loves role play, playi dress up and beating boy at everything. She is the founder of the London Si School which offers IRL sissification sessions and online classes and will so be opening a Milton Key branch.
